

Thrust Area

- Crop diversification and varietal substitution
- Integrated Nutrient Management practices in crops
- Acid soil reclamation
- Integrated Pest & Disease Management
- Improving productivity of horticultural crops
- Farm mechanization, post-harvest and soil and water conservation
- Drudgery reduction
- Scientific management of Goatery, Apiary, Fishery & Dairy
- Organic farming
- Post-Harvest Management and Value Addition
- Soil and Water Conservation
- Organic farming-use of vermicompost, Azolla and biofertiliser

Problem Identified

- Improper Fertilizer Management
- High labour intensive crops and less profit
- Poor Commercial Horticulture
- Low Productivity of Diary, Goatery, Poultry, Pisciculture
- Malnutrition
- Low family income
- Deforestation and less availability of fuel wood & fodder, Unscientific harvesting of non-timber forest products
- Unemployment and poverty of landless farmers
- Low yield of crops due to high incidence of pest & diseases
- Unutilized natural resource
